# Learning Objectives

MedBridge  
*Home Health Assessment Part 2: Data Analysis and Care Planning*  
Cindy Krafft, PT, MS  
Dee Kornetti, PT, MA

## Course Objectives

### **Chapter 1: Analyzing Subjective and Objective Data**

- Define the focus of assessment and the connection to both subjective and objective information.
- Establish clear connections between measurable data and patient specific functional relevance.
- Examine documentation strategies to create meaningful assessment content without a risk of repetition.

### **Chapter 2: Providing “Professional Opinion” and Creating a Care Plan**

- Define planning care from the beginning and throughout an episode of care.
- Discuss the connection between subjective information, objective data, assessment, and care planning.
- Examine specific documentation opportunities to confirm and update an active care plan.
