

Objectives and Program Schedule

MedBridge

Childhood Apraxia of Speech: Treatment of School-Aged Children

Ruth Stoeckel, PhD, CCC-SLP

Chapter 1: Connecting Research to Practice

- Introduce current evidence that should inform clinical practice
- Provide rationale for intervention framework

Chapter 2: Target Selection Strategies

- Emphasize importance of target selection for maximizing outcomes
- Review considerations that influence target selection

Chapter 3: Issues for School-Aged Children

- Review considerations specific to school-age children
- Reinforce empirical evidence regarding risk for co-occurring problems
